Audit Updates

Initial Audit	23rd July 2022 https://github.com/cyberscope-io/audits/tree/main/beers/v1/audit.pdf
Corrected Phase 1	19th August 2022 https://github.com/cyberscope-io/audits/tree/main/beers/v2/audit.pdf
Corrected Phase 2	23rd August 2022 https://github.com/cyberscope-io/audits/tree/main/beers/v3/audit.pdf

Contract Analysis

Critical Medium Minor / Informative Pass

Severity	Code	Description	Status
●	ST	Stops Transactions	Passed
●	OCTD	Transfers Contract's Tokens	Passed
●	OTUT	Transfers User's Tokens	Passed
●	ELFM	Exceeds Fees Limit	Passed
●	ULTW	Transfers Liquidity to Team Wallet	Unresolved
●	MT	Mints Tokens	Passed
●	BT	Burns Tokens	Passed
●	BC	Blacklists Addresses	Passed

ULTW - Transfers Liquidity to Team Wallet

Criticality	minor / informative
Location	contract.sol#L1998
Status	Unresolved

Description

The contract owner has the authority to transfer funds without limit to the team wallet. These funds have been accumulated from fees collected from the contract. The owner may take advantage of it by calling the `Sweep` method.

```
function Sweep() external onlyOwner {
    uint256 balance = address(this).balance;
    payable(owner()).transfer(balance);
}
```

Recommendation

The contract could embody a check for the maximum amount of funds that can be swapped. Since a huge amount may volatile the token's price.

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. That risk can be prevented by temporarily locking the contract or renouncing ownership.

Contract Diagnostics

● Critical ● Medium ● Minor / Informative

Severity	Code	Description	Status
●	L01	Public Function could be Declared External	Unresolved
●	L02	State Variables could be Declared Constant	Unresolved
●	L03	Redundant Statements	Unresolved
●	L04	Conformance to Solidity Naming Conventions	Unresolved
●	L07	Missing Events Arithmetic	Unresolved
●	L09	Dead Code Elimination	Unresolved
●	L14	Uninitialized Variables in Local Scope	Unresolved

L01 - Public Function could be Declared External

Criticality	minor / informative
Location	contract.sol#L589,618,184,1087,622,594,600,1012,1071,585,636,199,189,571,559,614,1020,567,1016,653,210,605,610,626,203,580,195,563
Status	Unresolved

Description

Public functions that are never called by the contract should be declared external to save gas.

```
approve
minimumTokensBeforeSwapAmount
renounceOwnership
GetSwapMinutes
buyBackSellLimitAmount
transferFrom
increaseAllowance
isExcludedFromFee
GetBuyBackTimeInterval
...
```

Recommendation

Use the external attribute for functions never called from the contract.

L02 - State Variables could be Declared Constant

Criticality	minor / informative
Location	contract.sol#L507,498,497
Status	Unresolved

Description

Constant state variables should be declared constant to save gas.

```
_isEnabledBuyBackAndBurn
_buyBackMaxTimeForHistories
_buyBackTimeInterval
```

Recommendation

Add the constant attribute to state variables that never change.

L03 - Redundant Statements

Criticality	minor / informative
Location	contract.sol#L20
Status	Unresolved

Description

The contract contains statements that are not used and have no effect. As a result, those segments increase the code size of the contract unnecessarily.

```
Context
```

Recommendation

Remove the redundant statements in order to decrease the code size.

L04 - Conformance to Solidity Naming Conventions

Criticality	minor / informative
Location	contract.sol#L1188,482,985,1169,498,1071,1194,477,487,432,1128,1215,1199,1087,467,507,256,272,449,470,497,1136,991,255,496,448,1146,494,480,474,1091,476,450,479,1207,473,1067,293,489,1082,485,1132,444,1141,495
Status	Unresolved

Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow _ at the beginning of the mixed_case match for private variables and unused parameters.

```
_to
_buyBackRangeRate
_amount
_router
_buyBackMaxTimeForHistories
GetBuyBackTimeInterval
Sweep
_sellLiquidityFee
LPDivisor
...
```

Recommendation

Follow the Solidity naming convention.
https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions.

L07 - Missing Events Arithmetic

Criticality	minor / informative
Location	contract.sol#L1128,1104,1115,1099,1119,1091,1067,1095,1082,1124,1111
Status	Unresolved

Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
minimumTokensBeforeSwap = _minimumTokensBeforeSwap
_sellTaxFee = sellTaxFee
buyBackSellLimit = buyBackSellSetLimit
_buyTaxFee = buyTaxFee
_maxTxAmount = maxTxAmount
_intervalMinutesForSwap = newMinutes * 60
_buyBackDivisor = newDivisor
_taxFee = taxFee
_buyBackRangeRate = newPercent
...
```

Recommendation

Emit an event for critical parameter changes.

L09 - Dead Code Elimination

Criticality	minor / informative
Location	contract.sol#L133,137,142,102,129,125
Status	Unresolved

Description

Functions that are not used in the contract, and make the code's size bigger.

```
functionCallWithValue
_functionCallWithValue
isContract
functionCall
```

Recommendation

Remove unused functions.

L14 - Uninitialized Variables in Local Scope

Criticality	minor / informative
Location	contract.sol#L700
Status	Unresolved

Description

The are variables that are defined in the local scope and are not initialized.

```
sellHistory
```

Recommendation

All the local scoped variables should be initialized.

Contract Flow

Summary

The Smart Contract analysis reported one minor severity issue. The contract owner has the authority to transfer funds to the team's wallet. Other than that, the contract owner can access some admin functions that can not be used in a malicious way to disturb the users' transactions. There is also a max limit of 25% fees.

About Cyberscope

Coinscope audit and K.Y.C. service has been rebranded to Cyberscope.

Coinscope is the leading early coin listing, voting and auditing authority firm. The audit process is analyzing and monitoring many aspects of the project. That way, it gives the community a good sense of security using an informative report and a generic score.

Cyberscope and Coinscope are aiming to make crypto discoverable and efficient globally. They provide all the essential tools to assist users draw their own conclusions.
