## Contract Review

<b>Contract Name</b>	BitindiChain
<b>Compiler Version</b>	v0.8.17+commit.8df45f5f
<b>Optimization</b>	5000 runs
<b>Licence</b>	MIT
<b>Explorer</b>	<a href="https://bscscan.com/token/0x77fc65dedA64f0CCA9e3aEa7b9D8521f4151882e">https://bscscan.com/token/0x77fc65dedA64f0CCA9e3aEa7b9D8521f4151882e</a>
<b>Symbol</b>	BNI
<b>Decimals</b>	18
<b>Total Supply</b>	50,000,000
<b>Domain</b>	<a href="https://bitindi.com">https://bitindi.com</a>

## Source Files

<b>Filename</b>	<b>SHA256</b>
<b>contract.sol</b>	e9ac630cbc1e3a5a9f590247abc3c26c9ba6f149d0309f56d602c0a8bd7779b5

## Audit Updates

<b>Initial Audit</b>	8th October 2022
<b>Corrected</b>	

# Contract Analysis

● Critical ● Medium ● Minor / Informative ● Pass

Severity	Code	Description	Status
●	ST	Stops Transactions	Passed
●	OCTD	Transfers Contract's Tokens	Passed
●	OTUT	Transfers User's Tokens	Passed
●	ELFM	Exceeds Fees Limit	Passed
●	ULTW	Transfers Liquidity to Team Wallet	Passed
●	MT	Mints Tokens	Passed
●	BT	Burns Tokens	Passed
●	BC	Blacklists Addresses	Passed

# Contract Diagnostics

● Critical   ● Medium   ● Minor / Informative

Severity	Code	Description	Status
●	L04	Conformance to Solidity Naming Conventions	Unresolved
●	L07	Missing Events Arithmetic	Unresolved
●	L09	Dead Code Elimination	Unresolved
●	L12	Using Variables before Declaration	Unresolved
●	L14	Uninitialized Variables in Local Scope	Unresolved

## L04 - Conformance to Solidity Naming Conventions

<b>Criticality</b>	minor / informative
<b>Location</b>	contract.sol#L145,128,126,146,408,33,138,469,129,117,114,171,130,144,127
<b>Status</b>	Unresolved

### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow `_` at the beginning of the `mixed_case` match for private variables and unused parameters.

```
maxRoundtripTax
_symbol
startingSupply
masterTaxDivisor
_antiBlock
WETH
_taxRates
_antiSnipe
_minReflection
...
```

### Recommendation

Follow the Solidity naming convention.

<https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions>.

## L07 - Missing Events Arithmetic

<b>Criticality</b>	minor / informative
<b>Location</b>	contract.sol#L479,448,457,431,426,474
<b>Status</b>	Unresolved

### Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
reflectorGas = gas
swapThreshold = (_tTotal * thresholdPercent) / thresholdDivisor
piSwapPercent = priceImpactSwapPercent
_maxWalletSize = (_tTotal * percent) / divisor
_maxTxAmount = (_tTotal * percent) / divisor
minimumHoldForRewards = (_tTotal * percent) / divisor
```

### Recommendation

Emit an event for critical parameter changes.

## L09 - Dead Code Elimination

<b>Criticality</b>	minor / informative
<b>Location</b>	contract.sol#L520
<b>Status</b>	Unresolved

### Description

Functions that are not used in the contract, and make the code's size bigger.

```
_basicTransfer
```

### Recommendation

Remove unused functions.

## L12 - Using Variables before Declaration

<b>Criticality</b>	minor / informative
<b>Location</b>	contract.sol#L632
<b>Status</b>	Unresolved

### Description

The contract is using a variable before the declaration. This is usually happening either if it has not been declared yet or the variable has been declared in a different scope.

check

### Recommendation

The variables should be declared before any usage of them.

## L14 - Uninitialized Variables in Local Scope

<b>Criticality</b>	minor / informative
<b>Location</b>	contract.sol#L631,632
<b>Status</b>	Unresolved

### Description

There are variables that are defined in the local scope and are not initialized.

checked  
check

### Recommendation

All the local scoped variables should be initialized.

The domain was created almost 2 years before the creation of the audit. It will expire in about 1 year and 1 month.

There is no public billing information, the creator is protected by the privacy settings.

## Summary

Bitindi Chain Token is an interesting project that has a friendly and growing community. The Smart Contract analysis reported no compiler error or critical issues. The contract Owner can access some admin functions that can not be used in a malicious way to disturb the users' transactions. There is also a limit of max 20% fees.

# About Cyberscope

Coinscope audit and K.Y.C. service has been rebranded to Cyberscope.

Coinscope is the leading early coin listing, voting and auditing authority firm. The audit process is analyzing and monitoring many aspects of the project. That way, it gives the community a good sense of security using an informative report and a generic score.

Cyberscope and Coinscope are aiming to make crypto discoverable and efficient globally. They provide all the essential tools to assist users draw their own conclusions.
