About Cyberscope	5

Introduction

Cyberscope audited six sections of the Battle World ecosystem. The Battle Word ecosystem provides functionality to purchase tickets and buy NFTs.

- The Vault contract is responsible for saving the accumulated funds.
- The NFT1155 contract is the NFT contract.
- The RaffleTicket represents the digital currency for the ecosystem.
- The RaffleDistributor contract is responsible for the ticket purchases mechanism.
- The RaffleRefund contract is responsible to redeem tickets and return the corresponding funds to the user.
- The NFTDistributor is responsible for selling NFTs using raffle tickets as the currency.

Recommendation Across Files

The owners and the permissions functionality is repetitive across all the contracts. It could be moved to a separate contract so that all the contracts will share exactly the sale functionality.
