Contract Review

Contract Name	JiyuToken
Compiler Version	v0.8.15+commit.e14f2714
Testing Deploy	https://testnet.bscscan.com/token/0xE8d3c701A950A1649B18bE8fF6494195596Db7e
Symbol	JYU
Decimals	18
Total Supply	1,000,000,000
Domain	jiyu.me

Source Files

Filename	SHA256
contract.sol	2ee5a1546e2c299bd714abd3dbca196871001baad222eb5a47f7ef3cac6d2f05

Audit Updates

Initial Audit	9th November 2022
Corrected	

Contract Analysis

● Critical ● Medium ● Minor / Informative ● Pass

Severity	Code	Description	Status
●	ST	Stops Transactions	Passed
●	OCTD	Transfers Contract's Tokens	Passed
●	OTUT	Transfers User's Tokens	Passed
●	ELFM	Exceeds Fees Limit	Passed
●	ULTW	Transfers Liquidity to Team Wallet	Passed
●	MT	Mints Tokens	Passed
●	BT	Burns Tokens	Passed
●	BC	Blacklists Addresses	Passed

Contract Diagnostics

● Critical ● Medium ● Minor / Informative

Severity	Code	Description	Status
●	FSA	Fixed Swap Address	Unresolved
●	L02	State Variables could be Declared Constant	Unresolved
●	L04	Conformance to Solidity Naming Conventions	Unresolved
●	L07	Missing Events Arithmetic	Unresolved
●	L09	Dead Code Elimination	Unresolved
●	L13	Divide before Multiply Operation	Unresolved

FSA - Fixed Swap Address

Criticality	minor / informative
Location	contract.sol#L502
Status	Unresolved

Description

The swap address is assigned once in the constructor and it can not be changed. The decentralized swaps sometimes create a new swap version or abandon the current. A contract that cannot change the swap address may not be able to catch-up the upgrade.

```
IUniswapV2Router02 _uniswapV2Router =  
IUniswapV2Router02(0xD99D1c33F9fC3444f8101754aBC46c52416550D1);  
uniswapV2Pair = IUniswapV2Factory(0x6725F303b657a9451d8BA641348b6761A6CC7a17)  
.createPair(address(this), _uniswapV2Router.WETH());  
uniswapV2Router = _uniswapV2Router;
```

Recommendation

It could be better to allow the swap address mutation in case of future swap updates.

L02 - State Variables could be Declared Constant

Criticality	minor / informative
Location	contract.sol#L460,450,447,451,449,459,445
Status	Unresolved

Description

Constant state variables should be declared constant to save gas.

```
_saleMarketingFee  
_symbol  
_tFeeTotal  
_decimals  
_name  
_saleLiquidityFee  
_tTotal
```

Recommendation

Add the constant attribute to state variables that never change.

L04 - Conformance to Solidity Naming Conventions

Criticality	minor / informative
Location	contract.sol#L969,459,230,928,422,246,964,579,456,229,909,937,806,460,267,922,859,916,463,453
Status	Unresolved

Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow `_` at the beginning of the `mixed_case` match for private variables and unused parameters.

```
_amount  
_saleLiquidityFee  
PERMIT_TYPEHASH  
_enabled  
_users  
MINIMUM_LIQUIDITY  
_minimumTokensBeforeSwapAmount  
_stakingFee  
DOMAIN_SEPARATOR  
...
```

Recommendation

Follow the Solidity naming convention.

<https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions>.

L07 - Missing Events Arithmetic

Criticality	minor / informative
Location	contract.sol#L916,909,969
Status	Unresolved

Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
_minimumTokensBeforeSwap = __minimumTokensBeforeSwap  
_maxTxAmount = _amount  
_walletHoldingMaxLimit = _amount
```

Recommendation

Emit an event for critical parameter changes.

L09 - Dead Code Elimination

Criticality	minor / informative
Location	contract.sol#L91,108,112,117,80,104,100
Status	Unresolved

Description

Functions that are not used in the contract, and make the code's size bigger.

```
sendValue  
functionCallWithValue  
_functionCallWithValue  
isContract  
functionCall
```

Recommendation

Remove unused functions.

L13 - Divide before Multiply Operation

Criticality	minor / informative
Location	contract.sol#L429
Status	Unresolved

Description

Performing divisions before multiplications may cause lose of prediction.

```
_walletHoldingMaxLimit = _tTotal.div(100).mul(2)  
_maxTxAmount = _tTotal.div(100).mul(1)
```

Recommendation

The multiplications should be prior to the divisions.

The domain was created about 1 month before the creation of the audit. It will expire in 11 months.

There is no public billing information, the creator is protected by the privacy settings.

Summary

Jiyu is an interesting project that has a friendly and growing community. The Smart Contract analysis reported no compiler error or critical issues. The contract Owner can access some admin functions that can not be used in a malicious way to disturb the users' transactions. There is also a limit of max 8% fees.

About Cyberscope

Coinscope audit and K.Y.C. service has been rebranded to Cyberscope.

Coinscope is the leading early coin listing, voting and auditing authority firm. The audit process is analyzing and monitoring many aspects of the project. That way, it gives the community a good sense of security using an informative report and a generic score.

Cyberscope and Coinscope are aiming to make crypto discoverable and efficient globally. They provide all the essential tools to assist users draw their own conclusions.
