# **Audit Updates**

| Initial Audit | 22nd May 2022 |
|---------------|---------------|
| Corrected     |               |

# **Contract Analysis**

CriticalMediumMinorPass

| Severity | Code | Description   |
|----------|------|---|
| •        | ST   | Contract Owner is not able to stop or pause transactions  |
| •        | OCTD | Contract Owner is not able to transfer tokens from specific address   |
| •        | OTUT | Owner Transfer User's Tokens  |
| •        | ELFM | Contract Owner is not able to increase fees more than a reasonable percent (25%)                                  |
| •        | ULTW | Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent |
| •        | MT   | Contract Owner is not able to mint new tokens   |
| •        | ВТ   | Contract Owner is not able to burn tokens from specific wallet  |
| •        | ВС   | Contract Owner is not able to blacklist wallets from selling  |

# **Contract Diagnostics**

CriticalMediumMinor

| Severity | Code | Description                                |
|----------|------|--|
| •        | L01  | Public Function could be Declared External |
| •        | L04  | Conformance to Solidity Naming Conventions |
| •        | L07  | Missing Events Arithmetic                  |
| •        | L08  | Tautology or Contradiction                 |
| •        | L09  | Dead Code Elimination                      |

#### L01 - Public Function could be Declared External

| Criticality | minor   |
|-------------|---|
| Location    | contract.sol#L165,173,1045,1049,1053,1057,1066,1075,1084,1093,1110,1123,11 39,1143,1147,1159,1187,1234,1238,1261,1435 |

#### Description

Public functions that are never called by the contract should be declared external to save gas.

isExcludedFromFee
setSwapAndLiquifyEnabled
includeInFee
excludeFromFee
excludeFromReward
reflectionFromToken
deliver
totalFees
isExcludedFromReward
...

#### Recommendation

Use the external attribute for functions never called from the contract.

# L04 - Conformance to Solidity Naming Conventions

| Criticality | minor   |
|-------------|---|
| Location    | contract.sol#L641,1261,1396,1400,1408,940,943,946,951 |

#### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow \_ at the beginning of the mixed\_case match for private variables and unused parameters.

```
_charityAddress
_charityFee
_liquidityFee
_taxFee
_amount
_enabled
WETH
```

#### Recommendation

Follow the Solidity naming convention.

https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions

### L07 - Missing Events Arithmetic

| Criticality | minor                   |
|-------------|-------------------------|
| Location    | contract.sol#L1242,1250 |

#### Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
_liquidityFee = liquidityFeeBps
_taxFee = taxFeeBps
```

#### Recommendation

Emit an event for critical parameter changes.

#### L08 - Tautology or Contradiction

| Criticality | minor             |
|-------------|-------------------|
| Location    | contract.sol#L972 |

#### Description

Detects expressions that are tautologies or contradictions. For instance, an uint variable will always be greater than or equal to zero.

```
require(bool,string)(taxFeeBps_ >= 0,Invalid tax fee)
require(bool,string)(charityFeeBps_ >= 0,Invalid charity fee)
require(bool,string)(liquidityFeeBps_ >= 0,Invalid liquidity fee)
```

#### Recommendation

Fix the incorrect comparison by changing the value type or the comparison.

#### L09 - Dead Code Elimination

| Criticality | minor   |
|-------------|---|
| Location    | contract.sol#L494,504,523,537,583,593,556,566,441,469,610 |

#### Description

Functions that are not used in the contract, and make the code's size bigger.

verifyCallResult
sendValue
isContract
functionStaticCall
functionDelegateCall
functionCallWithValue
functionCall

#### Recommendation

Remove unused functions.

# **Contract Functions**

| Contract | Туре                        | Bases      |            |           |
|----------|-----------------------------|------------|------------|-----------|
