## **Contract Review**

Contract Name	BSCBETS		
Compiler Version	v0.8.12+commit.f00d7308		
Optimization	0 runs		
Testing Deploy	https://testnet.bscscan.com/token/0x40Bd10f43A479B2 882E8ca42f98E03dd70630C21		
Symbol	BETS		
Decimals	18		
Total Supply	1,000,000		
Domain	bscbets.io		

## Source Files

Filename	SHA256
contract.sol	e9738e77cfedc26f0176af992e0d3b80217e2f26a289f071 d457b3e1e1fde267

## **Audit Updates**

Initial Audit	5th November 2022
Corrected	

## **Contract Analysis**

CriticalMediumMinor / InformativePass

Severity	Code	Description	Status
•	ST	Stops Transactions	Passed
•	OCTD	Transfers Contract's Tokens	Passed
•	OTUT	Transfers User's Tokens	Passed
•	ELFM	Exceeds Fees Limit	Passed
•	ULTW	Transfers Liquidity to Team Wallet	Passed
•	MT	Mints Tokens	Passed
•	ВТ	Burns Tokens	Passed
•	ВС	Blacklists Addresses	Passed

5

# **Contract Diagnostics**

CriticalMediumMinor / Informative

Severity	Code	Description	Status
•	L04	Conformance to Solidity Naming Conventions	Unresolved
•	L07	Missing Events Arithmetic	Unresolved
•	L12	Using Variables before Declaration	Unresolved
•	L13	Divide before Multiply Operation	Unresolved
•	L14	Uninitialized Variables in Local Scope	Unresolved

# L04 - Conformance to Solidity Naming Conventions

Criticality	minor / informative
Location	contract.sol#L148,163,133,408,33,150,115,177,139,428,147,113,116,149,117,438,114
Status	Unresolved

#### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow \_ at the beginning of the mixed\_case match for private variables and unused parameters.

```
maxSellTaxes
_taxWallets
_taxRates
_antiSnipe
WETH
masterTaxDivisor
_symbol
_hasLiqBeenAdded
_antiBlock
...
```

#### Recommendation

Follow the Solidity naming convention.

https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions.

## L07 - Missing Events Arithmetic

Criticality	minor / informative
Location	contract.sol#L449,458
Status	Unresolved

### Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
swapThreshold = (_tTotal * thresholdPercent) / thresholdDivisor
piSwapPercent = priceImpactSwapPercent
```

#### Recommendation

Emit an event for critical parameter changes.

## L12 - Using Variables before Declaration

Criticality	minor / informative
Location	contract.sol#L652
Status	Unresolved

### Description

The contract is using a variable before the declaration. This is usually happening either if it has not been declared yet or the variable has been declared in a different scope.

check

#### Recommendation

The variables should be declared before any usage of them.

## L13 - Divide before Multiply Operation

Criticality	minor / informative
Location	contract.sol#L541
Status	Unresolved

## Description

Performing divisions before multiplications may cause lose of prediction.

```
toLiquify = ((contractTokenBalance * ratios.liquidity) / ratios.totalSwap) / 2
```

#### Recommendation

The multiplications should be prior to the divisions.

## L14 - Uninitialized Variables in Local Scope

Criticality	minor / informative
Location	contract.sol#L651,652
Status	Unresolved

## Description

The are variables that are defined in the local scope and are not initialized.

checked check

#### Recommendation

All the local scoped variables should be initialized.

Registrar IANA ID	1068

The domain was created 24 days before the creation of the audit. It will expire in 11 months.

There is no public billing information, the creator is protected by the privacy settings.

## Summary

Bsc Bets is an interesting project that has a friendly and growing community. The Smart Contract analysis reported no compiler error or critical issues. The contract Owner can access some admin functions that can not be used in a malicious way to disturb the users' transactions. There is also a limit of max 9% fees.

## About Cyberscope

Coinscope audit and K.Y.C. service has been rebranded to Cyberscope.

Coinscope is the leading early coin listing, voting and auditing authority firm. The audit process is analyzing and monitoring many aspects of the project. That way, it gives the community a good sense of security using an informative report and a generic score.

Cyberscope and Coinscope are aiming to make crypto discoverable and efficient globally. They provide all the essential tools to assist users draw their own conclusions.
