# **Contract Diagnostics**

CriticalMediumMinor

Severity	Code	Description
•	L01	Public Function could be Declared External
•	L04	Conformance to Solidity Naming Conventions
•	L09	Dead Code Elimination

#### L01 - Public Function could be Declared External

Criticality	minor
Location	contract.sol#L165,173,516,524,541,548,555,573,586,603,626,655,682

#### Description

Public functions that are never called by the contract should be declared external to save gas.

decreaseAllowance
increaseAllowance
transferFrom
approve
allowance
transfer
balanceOf
totalSupply
decimals
...

#### Recommendation

Use the external attribute for functions never called from the contract.

# L04 - Conformance to Solidity Naming Conventions

Criticality	minor
Location	contract.sol#L509

#### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow \_ at the beginning of the mixed\_case match for private variables and unused parameters.

\_enable

#### Recommendation

Follow the Solidity naming convention.

https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions

### L09 - Dead Code Elimination

Criticality	minor
Location	contract.sol#L764,809

#### Description

Functions that are not used in the contract, and make the code's size bigger.

```
_setupDecimals
_burn
```

#### Recommendation

Remove unused functions.
