# **Audit Updates**

| Initial Audit | 31st May 2022 |
|---------------|---------------|
| Corrected     |               |

# **Contract Analysis**

CriticalMediumMinorPass

| Severity | Code | Description   |
|----------|------|---|
| •        | ST   | Contract Owner is not able to stop or pause transactions  |
| •        | OCTD | Contract Owner is not able to transfer tokens from specific address   |
| •        | OTUT | Owner Transfer User's Tokens  |
| •        | ELFM | Contract Owner is not able to increase fees more than a reasonable percent (25%)                                  |
| •        | ULTW | Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent |
| •        | MT   | Contract Owner is not able to mint new tokens   |
| •        | ВТ   | Contract Owner is not able to burn tokens from specific wallet  |
| •        | ВС   | Contract Owner is not able to blacklist wallets from selling  |

# **ULTW - Unlimited Liquidity to Team Wallet**

| Criticality | minor             |
|-------------|-------------------|
| Location    | contract.sol#L429 |

#### Description

The contract owner has the authority to transfer funds without limit to the team wallet. These funds have been accumulated from fees collected from the contract. The owner may take advantage of it by calling the manualTransfer function but it also happens passively on each transaction.

```
function transferTax() internal {
    uint256 amount = _balances[address(this)];
    _basicTransfer(address(this), taxReceiver, amount);
}
```

#### Recommendation

The contract should not send all the tokens from fees to the team's wallet.

# **Contract Diagnostics**

CriticalMediumMinor

| Severity | Code | Description                                |
|----------|------|--|
| •        | L01  | Public Function could be Declared External |
| •        | L02  | State Variables could be Declared Constant |
| •        | L04  | Conformance to Solidity Naming Conventions |
| •        | L07  | Missing Events Arithmetic                  |

# L01 - Public Function could be Declared External

| Criticality | minor                         |
|-------------|-------------------------------|
| Location    | contract.sol#L280,287,308,450 |

#### Description

Public functions that are never called by the contract should be declared external to save gas.

getCirculatingSupply
transferOwnership
unauthorize
authorize

#### Recommendation

Use the external attribute for functions never called from the contract.

# L02 - State Variables could be Declared Constant

| Criticality | minor                     |
|-------------|---------------------------|
| Location    | contract.sol#L327,328,333 |

#### Description

Constant state variables should be declared constant to save gas.

```
_totalSupply
ZERO
DEAD
```

#### Recommendation

Add the constant attribute to state variables that never change.

# L04 - Conformance to Solidity Naming Conventions

| Criticality | minor   |
|-------------|---|
| Location    | contract.sol#L414,434,438,442,327,328,330,331,332,333,334,335,339,340 |

#### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow \_ at the beginning of the mixed\_case match for private variables and unused parameters.

```
maxTax
taxDenominator
_allowances
_balances
_totalSupply
_decimals
_symbol
_name
ZERO
...
```

#### Recommendation

Follow the Solidity naming convention.

https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions

# L07 - Missing Events Arithmetic

| Criticality | minor                 |
|-------------|-----------------------|
| Location    | contract.sol#L414,442 |

#### Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
taxThreshold = _amount
sellTax = _sellTax
```

#### Recommendation

Emit an event for critical parameter changes.

# **Contract Functions**

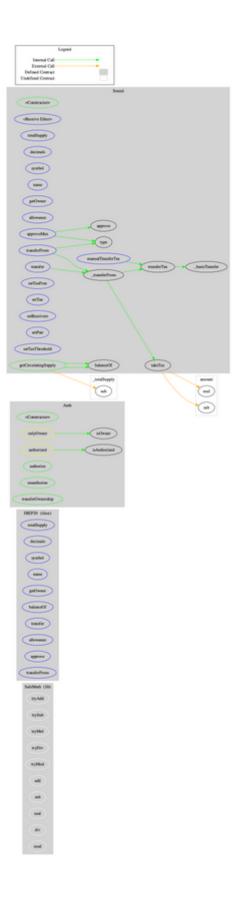

| Contract | Туре                        | Bases      |            |           |

The domain has been created 4 days before the creation of the audit. It will expire in 12 months.

There is no public billing information, the creator is protected by the privacy settings.

# Summary

The Smart Contract analysis reported one minor severity issue. The contract owner has the authority to transfer funds to the team's wallet. A multi-wallet signing pattern will provide security against potential hacks. There is also a limit of max 10% fees.

# About Cyberscope

Coinscope audit and K.Y.C. service has been rebranded to Cyberscope.

Coinscope is the leading early coin listing, voting and auditing authority firm. The audit process is analyzing and monitoring many aspects of the project. That way, it gives the community a good sense of security using an informative report and a generic score.

Cyberscope and Coinscope are aiming to make crypto discoverable and efficient globally. They provide all the essential tools to assist users draw their own conclusions.
